4G Identity Solutions

Authentic People, Unique IDs.™

Unleashing Unique Identity
Across the World

Corporate Profile

Company Profile

4G Identity Solutions (4Gid) is a Pioneer (since 2001) & Global leader in providing large scale identity management solutions leveraging smart cards and biometric technologies. 4Gid specializes as an end-to-end identity management solutions provider & system integrator in Civil ID, Homeland Security & Law Enforcement for government, corporate, banking and defense sectors. 4Gid has re-defined ID management business space by providing thought leadership and proof of concepts that led to the world's largest ID programmes. 4Gid has executed many of the world's first large scale identity management solutions for federal governments, multilateral agencies and top notch corporates, and is currently delivering the world's biggest Civil ID project – India's Unique ID / Aadhaar.

4Gid strives to contribute in bringing today, best of the breed technologies of tomorrow and has set new benchmarks in the identity management industry. In terms of innovation and solution readiness, 4Gid has consistently been ahead of the pack. 4Gid believes and practices a proactive approach to solutioning. 4Gid experts are consistently helping in understanding client requirements and working on novel approaches to meet the same. 4Gid has pioneering solutions catering to the needs of Public Service Delivery Infrastructure, Public Distribution System, Pensions, Social Welfare schemes, ePassport, eVisa, Immigration & Border Control, Voter ID, National ID and other innovative solutions that are set to create a new trend in ID Management.

4Gid strong delivery capabilities in handling large scale identity management projects has already resulted in phenomenal savings to the government exchequer, running into hundreds of millions of dollars - eliminating the errors of inclusion and exclusion in government welfare schemes thereby bringing value to millions of citizens and preventing leakages in the delivery of government welfare services like food subsidy programmes.

4Gid processes are CMMI Level 3 and ISO 9001:2008 certified for Identity Management Solutions including Biometric Devices and Smart Cards. The Company's Global Delivery Model provides for the best resources to be drawn from its talent pool across the globe to offer optimal solutions. The company has its own State of the Art R&D centre for developing Identity Management solutions and products. 4Gid also has a dedicated Centre of Excellence (COE) at its corporate **office**.

4Gid has been growing rapidly since inception. This growth indicates two points; the fact that the customers cherish our extended "trusted advisor" engagement model and that extended expert teams are inherently equipped to handle changing customer requirements with respect to scale and complexity. This growth keeps us on our toes, helps motivate, satisfy our employees (a reason for our low attrition compared to the IT industry average) and helps us focus on doing the right things at the right time

Company Profile

4Gid is a preferred partner to leading technology vendors across the globe and has a consistent record of executing Identity projects like AADHAAR (World's Biggest Civil ID), Public Distribution Project for State Government of Andhra Pradesh which was the first project in the world to use Iris on a large scale for Civil ID, National Population Register (NPR) project for Government of India, providing an end to end biometric solution for Biometric enabled Ration Cards for Government of Orissa through United Nations World Food Programme (UNWFP) to name a few.

The UNWFP Project was the first in the world to use multi-modal biometrics for civil identification. This is due to a combination of established methodology, quality processes, experience in project management, skilled business analysts, technical ability to handle complex assignments, and most importantly an insatiable thirst for new challenges. Another key success factor was 4Gid's ability to adapt biometric technologies developed in the west to rugged third world conditions. 4Gid's feedback based on these projects has made the biometric device manufactures tune their devices and algorithms to meet the requirements of third world countries.

4Gid strong delivery capabilities in handling large scale identity management projects has already resulted in phenomenal savings to the Government Exchequer running into hundreds of millions of dollars, eliminating the errors of inclusion and exclusion in Government welfare schemes thereby bringing value to millions of citizens and preventing leakages in the delivery of Government Welfare Services like Food Subsidy Programmes, Welfare housing schemes, Recruitment schemes etc
